PRE-ANESTHETIC – SPAY/NEUTER/DECLAW – RELEASE FORM

Please Read Carefully and Sign

Client Name: _____ Date: _____

Pet's Name: _____ Procedure: _____

I, the undersigned owner, hereby authorize any emergency medical or surgical treatment deemed necessary for the health and well being of my pet _____ during its stay at the Dr. Michael Hutchinson D.V.M., P.C. facility. I further understand that, regardless of age, Dr. Michael Hutchinson D.V.M., P.C. requires a pre-anesthetic blood screen. Our doctors use safe anesthetic and surgical protocols to minimize risk to your pet. No anesthetic or surgical procedure, however, is completely without risk to your pet. Although modern veterinary anesthetics are generally considered safe, problems can still occur. Complications from an anesthetic may range from mild nausea to prolonged recovery due to an organ problem (kidney or liver), to very rarely, death. These tests allow us to uncover important information regarding potential underlying problems that may affect your pet's ability to safely undergo anesthesia.

Our surgery prices now *include* the following services: Pre-anesthetic blood work, fluid therapy, an antibiotic injection, and pain control. The prices are for healthy animals under the age of 1 year. Prices may vary for pets over 1 year or with other pre-existing conditions. The prices are as follows:

Canine Spay-	< 20lbs	\$325.00	Feline Spay-	\$265.00	
	20-50lbs	\$350.00			
	51-85lbs	\$405.00	Feline Spay/Declaw-	\$325.00	
	86-125lbs	\$465.00			
Canine Neuter-	< 20lbs	\$315.00	Feline Declaw <i>only</i>-	\$212.00	
	20-50lbs	\$325.00		Feline Neuter/Declaw-	\$240.00
	>85lbs	\$355.00		Feline Neuter-	\$117.00

Please indicate if you would like us to perform any of these additional services
Please check one box in each category

Microchip Permanent Identification:

This is an excellent way to permanently identify your pet should they become lost or stolen. Microchipping is performed easily while your pet is sedated for surgery.

Cost \$35 to implant, additional fee to register chip.

Yes, I would like my pet micro-chipped during anesthesia. I understand I will be charged the additional fee above.

No, I decline the microchip at this time.

Additional Routine Screening Tests:

Cats:

FeLV/FIV blood test. \$47.00 (recommended once in all cats)

Dogs:

Heartworm blood test. \$27.00 (done at 6m or older and every 2 years while on preventative)

I decline routine screening tests for my dog or cat.
